MOBILITY CHECKLIST FOR CATS

Please complete the following checklist to help us determine if your cat may have any changes that might be indicative of arthritis or joint pain.

	YES	NO	NOT SURE
Does your cat sleep more and/or are they less active?			
Is your cat less willing to jump up or down?			
Will your cat only jump up or down from lower heights?			
Does your cat ever show signs of stiffness?			
Is your cat more reluctant to greet you or interact with you?			
Does your cat play with other animals or toys less?			
Does your cat have a poor coat?			
Does your cat spend less time grooming than before?			
Overall, is your cat less agile?			
Does your cat show signs of lameness or limping?			
Does your cat have more accidents outside the litter tray?			
Does your cat have difficulty getting in or out of the cat flap?			
Does your cat have difficulty going up or down stairs?
